

FINAL PROJECT VIDEO PRESENTATION GUIDELINES

Mobile Application Development

Purpose

The video presentation aims to assess your understanding of your mobile application, your ability to demonstrate features, and your confidence in explaining your own project.

Video Duration

Minimum: 5 minutes

Maximum: 8 minutes

Exceeding the time limit may result in deductions.

Video Content Requirements

Your video must include the following sections in order.

1. Introduction (30–45 seconds)

Face camera ON

Include:

- Project title
- Developer(s) name(s)
- Brief description of the app
- Target users

2. Problem Statement and Objectives (1 minute)

Face camera ON

Explain:

- What problem does your app solve?
- Why is this app important or needed?
- Main objectives of the application

3. App Features and Live Demo (3–4 minutes)

Screen recording required

Face camera must appear using picture-in-picture

Show and explain:

- Main features of the app
- Navigation flow
- Key functionalities
- Input validation and error handling (if applicable)

Voice narration is required at all times.

4. Challenges and Learning (1 minute)

Face camera ON

Discuss:

- Challenges encountered during development
- How you addressed them

- Key lessons learned

5. Conclusion (30 seconds)

Face camera ON

Include:

- Overall app summary
- Possible future improvements
- Final reflection

Presentation and Recording Guidelines

- Face must be clearly visible with proper lighting
- Speak clearly and confidently
- Avoid reading directly from notes
- Screen recording must be clear and readable

- Landscape orientation is required

- English or Filipino is allowed

- Background music is optional and must be low volume

File Format and Submission

- File format: MP4
- Filename format:
FinalProject_AppName_Surname.mp4
- Submission: Google Drive link

Academic Integrity

- The project must be original
- Properly credit external resources such as APIs, libraries, or tutorials
- Plagiarism will result in a grade of zero

Grading Criteria

App Functionality: 35%

Feature Demonstration: 30%

Presentation and Communication: 20%

Creativity and UI/UX: 15%
